Dr. Melissa Crochet and Dr. Sandra Brothers are pleased to welcome Dr. Angela Fields Walker to their practice. A graduate of U.T. Health Science Center in San Antonio, Dr. Fields recently completed her residency in obstetrics and gynecology at Parkland Memorial Hospital. In medical school, Dr. Fields was inducted into the Gold Humanism Honor Society for demonstrating excellence in clinical care, leadership, compassion and dedication to service. She continued to integrate these values into patient care during residency where she was awarded the Chairman’s Award for Outstanding Intern in 2006, and served as Administrative Chief Resident from 2008 to 2009.

A native of Dallas, Dr. Fields is enthusiastic about starting her private practice here with a group who shares her passion for women’s health. She is looking forward to meeting her new patients and developing lifelong relationships with them as she cares for them throughout the stages of womanhood. Dr. Fields is particularly interested in high risk obstetrics, minimally invasive gynecologic procedures and laparoscopic surgery, as well as adolescent and young adult medicine. Her dedication to patient-centered care and education, and her focus on treating the whole person, make her a perfect fit for the growing practice.

Brothers & Crochet OB/Gyn Associates of Dallas serves women during every phase of their lives, assisting them in maintaining optimal health from adolescence through menopause. While their treatment recommendations are derived from evidence-based medicine, their personal approach caters to the individual.

As a champion runner and consummate outdoorswoman, Dr. Brothers has a keen interest in positively influencing women’s health and fitness choices. Over the past eleven years, Dr. Brothers has seen her patients through a great variety of health issues, from contraceptive decisions for an athlete or an executive, to treatment options for heavy menstrual cycles, to birthing experiences for women who want minimal intervention. In addition, she has assisted many women with infertility issues, helping them achieve pregnancy.

After completing her residency at Parkland, Dr. Crochet relocated to Palo Alto, California, and Boulder, Colorado, where she pursued an interest in non-traditional approaches to healthcare. This experience has proven invaluable to her medical practice, especially as the use of herbal remedies and alternative medicines have become more accepted by the traditional medical community.

Dr. Crochet’s interactive and integrative approach to health care involves really getting to know her patients. As a result, she develops close, long-term relationships with her patients.

The physicians and staff of Brothers & Crochet OB/GYN Associates of Dallas share a passion for women’s health and wellness. Their mission is to provide the highest quality medical care in a caring and compassionate environment.

Lakewood Family Dental Care

Quality Dental Care

Lakewood Family Dental Care has been in the same location for 62 years. Like the Wildcats and the Lakewood Theater, they are an integral part of the community. But there’s nothing old-fashioned about this practice. With state-of-the-art equipment like the Cerec Unit that does crowns in one visit, Dr. Richard Beadle and Dr. Reid Slaughter combine traditional individualized dental care with the latest technologies and practices.

Dr. Beadle joined the Lakewood Office in 1981 and Dr. Slaughter has been in practice for nine years. Together, the two Baylor College of Dentistry graduates are geared toward providing leading edge care, all the while listening to what their patients really need and want. It’s a family atmosphere that pays off in beautiful smiles.
Dr. Mike Neeley travels the world as a dental missionary and speaker at conferences, but lucky for his patients, he always comes home to Dallas. He has practiced dentistry here for thirty years, forging lifelong friendships. “My patients are like family. I love being a dentist,” he says.

When patients come to see Dr. Neeley, they are in charge. After listening to his recommendations, they set the priorities and choose the treatments they’re comfortable with. It’s a stress-free, patient-friendly practice that serves the entire family. He is always accepting new patients, and he offers second opinions at no charge.

Dr. Neeley stays at the forefront of his profession, learning new procedures and applying the latest technologies. His patients appreciate Dr. Neeley’s years of experience combined with the leading edge care that his practice provides.

Dr. Travis Spillman offers comprehensive dental care for adults and children. Comprehensive care means that Dr. Spillman is committed to educating his patients about their options and providing a broad range of modern treatments, including preventative, cosmetic and advanced restorative procedures.

Treatment begins with an oral health examination and an assessment of the patient’s dental health needs and cosmetic or restorative goals. “I think it is imperative to educate my patients about the treatment options available to them. For preventative care, it’s really a matter of treating existing problems to achieve a healthy smile. For cosmetic and restorative cases, I like to offer my patients several options and then let them decide which one is right for them, based on their budget, time and desired outcome.”

Dr. Spillman earned his undergraduate degree from Baylor University and his doctorate of dental surgery degree from the University of Texas Dental Branch in Houston. He is a member of the Dallas County Dental Society and the Academy of General Dentistry.
